## Announcements

### Productivity Tools update

Starting June 10, 2024, you need to update to the new versions Productivity Tools.

This update includes:

- Webex icons
- Support to scheduling a meeting in a Shared Calendar that doesn't have a host account
- User Interface refresh with removal of features that no longer function
- Advanced cohost scheduling options

### What's new in this release

#### Webinars

##### **HTML support for the agenda in emails sent to webinar participants**

The agenda created for a webinar during scheduling is editable using html in the emails sent to the webinar participants. This provides flexibility to edit, move, or remove the agenda.

##### **Webcasts now support Kollektive and Ramp eCDNs**

Starting in 44.7 Webinars with Webcast View now support eCDN from Vbrick Ramp which improves the streaming experience for hybrid users. We are excited about this collaboration with Vbrick. We believe it will revolutionize the way organizations across the globe engage with their audiences, by delivering seamless and high-quality Webex webcasts at scale. Together, we are empowering businesses to connect and communicate with their employees, customers, and partners in ways never before possible.

#### Open bugs

See this table for open and resolved customer-found bugs for the latest versions of the Cisco Webex Meetings Suite.

Resolved bug lists are in order starting with the most recent update.

Bug number	Severity	Affected product area	Description
CSCvh90269	3	Webex Meetings	The Make Screen blank feature doesn't work on Windows 10 devices if User Account Control is enabled.
CSCvi72293	3	Webex Meetings (Mac)	If a user's Facebook account is locked, they can't stream Webex meetings on Facebook Live.
CSCvh63085	3	Webex Webinars (Windows)	During webinars, when a presenter shares their screen, participants can see chat notifications that appear to the presenter.

#### Resolved bugs
