

Important

Why is this happening? The Webex Suite Meeting Platform is the intended outcome of our journey to the converged meeting experience across Webex applications and devices. One application with one architecture providing an enhanced and optimized experience for hybrid work. Key Benefits:

- **One-App Solution**
Webinars will now run on the same platform as Webex meetings, offering a seamless experience across devices.
- **Streamlined Access**
Faster join times for quick and efficient webinar entry.
- **Improved Accessibility**
Barrier-free participation for all attendees.
- **Enhanced Scalability**
Larger-scale support with high-performance video mesh.

Comprehensive Content Management
Tools for pre, during, and post-webinar engagement

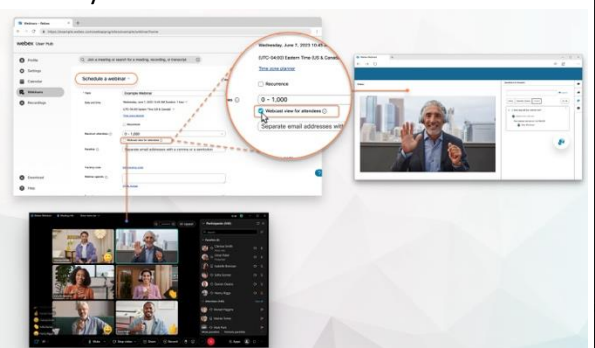

For more details on this Webinar update and other enhancements, see all key changes [HERE](#).

Key User Interface Changes

Webcast view for attendees

When you need attendees to join and view a livestream, interacting with panelists and hosts through chat, question and answer sessions, and polls, you can host a webinar in webcast view. You can start and manage a webinar in webcast view on your computer, mobile device, or a connected video system.

Slido for Government

Increase participant engagement in your Webex meetings through Slido's Polling Q&A feature. Once you launch Slido in Webex for Government, it is instantly ready for use. During the meeting, participants can ask questions directly in the Slido Q&A sidebar within the Webex window. The moderation feature allows hosts and co-hosts to review questions before they are visible to everyone, ensuring a smooth flow of discussion. Hosts and co-hosts can set up polls during Webex meetings in Slido sidebar using the . **+Add** button For more information about Slido for Government [Check out this article](#)

Improved Accessibility

To enhance the accessibility of webinars, several features are available to ensure inclusivity and ease of use for all participants, including:

- Sign language interpretation
- Live and post-webinar transcripts
- Automated closed captions
- Ability to mute flashy content
- Text adjustment settings

Need to manage your participants?

Go to More options in the meeting controls to access meeting o...ns and enable features like breakout sessions and whiteboarding
